Rafi Ullah

SOFTWARE ENGINEER — AI-INTEGRATED SYSTEMS

rafiullahh2005@gmail.com • LinkedIn • GitHub • Islamabad, Pakistan
Portfolio: rafi-builds.vercel.app

PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building AI-integrated, database-driven applications in C++, Python, Flutter, Java, Blazor, C#, and SQL Server. Practical experience embedding LLM-driven automation (Gemini API) into production app logic, alongside a strong foundation in object-oriented programming, data structures and algorithms, and relational database design. Completed a Full Stack AI Engineering fellowship covering mentor-reviewed, feedback-driven technical development. Interested in agentic AI systems, automated software engineering, and applying AI to build practical, real-world tools.

SKILLS

Languages: Java, C++, Python, JavaScript, C#, Dart, SQL, HTML, CSS, TypeScript

AI / LLM Integration: Gemini API integration, prompt-driven content generation, agentic workflow design, Full Stack AI Engineering (DevWeekends fellowship)

Frameworks & Technologies: Flutter, Firebase, Blazor Server, .NET 8, Next.js, React, FastAPI, Auth.js

Databases: SQL Server, Oracle DB, MySQL, Firestore, PostgreSQL

Tools: Git, GitHub, VS Code, Visual Studio, NetBeans

PROJECTS

SelfText - Conversational Productivity App | *Flutter, Dart, FastAPI, Firebase, PostgreSQL*

- Built a chat-based Android app connecting messages with notes, tasks, reminders and calendar views, with encrypted offline caches and account-separated cloud synchronization.
- Integrated editable AI-generated action proposals and multi-task plans with review before saving, backed by Firebase authentication and backend ownership checks.

GitHub: https://github.com/rafiullah39/selftext-backend (backend; private)

Naya Purana Store - Thrift E-commerce Website | *Next.js, React, TypeScript, PostgreSQL, Auth.js*

- Built a responsive thrift storefront with searchable product listings, category/condition/size filters, product details, saved finds, shopping bag and checkout workflows.
- Implemented PostgreSQL-backed inventory and order operations, owner MFA and manual advance-payment verification. Deployed a public Netlify sample storefront with real ordering gated pending launch readiness.

GitHub: https://github.com/rafiullah39/naya-purana (private)

Live site: naya-purana.netlify.app (sample storefront)

PROJECTS (CONTINUED)

DAIRA — AI-Driven Architectural Productivity Ecosystem | *Flutter, Firebase, Dart, Gemini API*

- Built a cross-platform Flutter/Firebase app where an integrated Gemini AI component autonomously generates day-by-day, multi-day challenge plans from a single user prompt — an early, practical application of agentic, AI-driven task generation.
- Used Firestore batch transactions to atomically commit AI-generated personal and public plan copies with zero partial writes, ensuring reliable state for the automated planning flow.
- Implemented real-time dashboards, a streak system with auto-reset on missed check-ins, and a social layer (live activity feed, streak-based leaderboard, kudos deduplication, community challenge discovery).

GitHub: https://github.com/rafiullah39/DAIRA

Blood Bank Management System | *Java, SQL Server, JDBC*

- Java desktop application managing donors, patients, blood inventory, requests, staff, suppliers, and appointments across a 15-table relational schema with full CRUD operations.
- Designed a normalized database with enforced foreign key constraints, multi-table JOIN queries, MERGE-based upserts, bulk conditional deletes, and expiry-based inventory monitoring.

GitHub: https://github.com/rafiullah39/BLOOD-BANK-MANAGEMENT-SYSTEM-

OTHER PROJECTS

ClientFlow CRM | Blazor Server, C#, ASP.NET Core, Entity Framework Core, SQL Server
Electronic Voting Machine | x86 Assembly, EMU8086
EduConnect Web Portal | Blazor Server, C#, .NET 8, Bootstrap 5

TRAINING & FELLOWSHIPS

DevWeekends Fellowship - Full Stack AI Engineering

- Completed a mentorship-based, feedback-driven fellowship covering full-stack development with AI engineering practices, structured version control workflows, and real-world data-handling application builds — mentor-reviewed at every stage.

CERTIFICATIONS

freeCodeCamp - JavaScript Developer Certification | September 25, 2026
Completed approximately 300 hours of work. Verify certification

EDUCATION

Air University Islamabad | *2024 - 2028 (Expected)*
Bachelor of Science in Computer Science | 5th Semester | CGPA: 3.13/4.0
