Rafi Ullah

Full Stack Developer (Web & Mobile)

rafiullahh2005@gmail.com | LinkedIn | GitHub | Portfolio: rafi-builds.vercel.app | Islamabad, Pakistan

SUMMARY

5th-semester Computer Science student who builds full stack web apps (HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js, NestJS) and cross-platform mobile apps (Flutter, Firebase). Experience adding AI features to real apps using the Gemini API. Looking for a remote junior developer role.

EDUCATION

Air University Islamabad, BS Computer Science (5th semester, CGPA 3.13/4.0) *2024 - 2028 (Expected)*

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Bootstrap
Backend: Node.js, NestJS, Auth.js, REST APIs
Mobile: Flutter, Dart, Firebase (Auth, Firestore)
Databases: PostgreSQL, SQL Server, MySQL, Firestore
AI: Gemini API integration, prompt-driven features
Other: Java, C++, C#, Blazor Server (.NET 8), Git, GitHub, VS Code

PROJECTS

Naya Purana - Thrift E-commerce Website | *Next.js, React, TypeScript, PostgreSQL, Auth.js*

- Built a responsive storefront with searchable listings, category/condition/size filters, saved finds, shopping bag and checkout.
- Implemented PostgreSQL-backed inventory and orders, owner MFA and manual payment verification. Public sample storefront: naya-purana.netlify.app. Code available on request.

SelfText - Conversational Productivity App | *Flutter, Dart, Firebase, PostgreSQL*

- Built a chat-based Android app linking messages with notes, tasks, reminders and calendar views, with encrypted offline cache and per-account cloud sync.
- Added editable AI-generated action proposals and multi-task plans reviewed by the user before saving; Firebase auth with backend ownership checks. Code available on request.

DAIRA - AI-Driven Productivity App | *Flutter, Firebase, Dart, Gemini API*

- Gemini generates day-by-day, multi-day challenge plans from a single user prompt; Firestore batch transactions save personal and public copies atomically, with no partial writes.
- Built real-time dashboards, streaks with auto-reset, a live activity feed, leaderboard and community challenges. GitHub

Blood Bank Management System | *Java, SQL Server, JDBC*

- Java desktop app for donors, patients, inventory, requests and staff on a normalized 15-table schema with foreign keys, JOINs, MERGE upserts and expiry monitoring. GitHub

Other projects: ClientFlow CRM (Blazor Server, C#, Entity Framework Core, SQL Server); EduConnect Web Portal (Blazor Server, .NET 8, Bootstrap 5)

TRAINING & CERTIFICATION

DevWeekends Fellowship - Full Stack AI Engineering

- Mentor-reviewed fellowship covering full stack development, Git workflows and building data-driven apps with AI tools.

freeCodeCamp - JavaScript Developer Certification (verify) *September 25, 2026*

- About 300 hours of JavaScript coursework and projects.
